Or... **AutoPay is FREE and automatic each month—details on our website. Pair it with Budget Plan to make your gas bill payment amount predictable.**

Change your dirty air filter before winter

Changing your furnace's air filter keeps air flowing without overworking the blower motor. You can save up to 15% off your energy bill this way.

You'll also keep out dust and dirt that can lead to expensive repairs or early system failure.

Check your current air filter for size and type marks, and visit your local hardware store for a replacement.

The internet has videos on air filter replacement, if you have never done it before. It's straightforward and easy. Look for a video for your furnace's make and model.

Sealing air leaks is a simple way to make your home more comfortable.

- Locate drafts around windows and door frames.
- Use caulk to seal cracks and gaps.
- Apply weather stripping to windows and doors.
