Or... **AutoPay is FREE and automatic each month—details on our website. Pair it with Budget Plan to make your gas bill payment amount predictable.**

Is your Carbon Monoxide (CO) Detector ready for 2023?

Different Types of CO Alarms

On average, carbon monoxide poisoning sends about 500 Wisconsinites to the emergency room each year. To protect yourself and your family from carbon monoxide, follow these safety tips:

- **Make sure you have working carbon monoxide detectors.** All homes and duplexes in Wisconsin are required to have detectors on every level, including the basement, but not the attic or storage areas. Detectors can be purchased at most hardware stores for \$20-50.
- **The beginning of January is a good time each year to replace the batteries in your detector and push the “Test” button to be sure it’s working properly.** Replace your detector every five years or according to manufacturer’s instructions.

Is your furnace more than 15 years old? Is it making weird noises? Does it run longer than usual? Filter changes and a tune-up may help and are always a good idea, but there’s also a chance it needs to be replaced.

There’s no time like the present to play it safe and have it looked at by a professional HVAC contractor.

You can find one at focusonenergy.com/findatradeally or call **800.762.7077** for more information.

*Some programs require that a resident must be a customer of a participating natural gas AND electric utility. Find out if your electric utility participates at focusonenergy.com/utilities.
