Gas employees will survey neighborhoods

St. Croix Gas employees will use gas detectors to survey one-third of our residential pipelines this summer. This is an annual regulatory requirement for gas utilities.

Our employees will check pipelines in front, back or side yards as well as streets. The gas detectors are extremely sensitive to the presence of methane, which is the primary component of natural gas.

Our employees wear blue uniforms as shown in this photo.

If you have a question about a person on your property, please feel free to call us at 715-425-6177 to verify whether they are a gas employee.

Is it time to tune up your AC unit? Just like tuning up a car, having a yearly tune-up of your heating and cooling systems will help to ensure everything is in tip-top shape. Having your heating and cooling contractor come out once a year to inspect your AC system will give you peace of mind in knowing that your AC is ready when you need it.

If you're looking for a professional to take a look at your AC system, you can find a qualified Trade Ally Contractor at <https://focusonenergy.com/trade-allies>.

*Some programs require that a resident must be a customer of a participating natural gas AND electric utility. Find out if your electric utility participates at focusonenergy.com/utilities.
