Is your Gas Meter's regulator iced up?

It could slow or stop your gas supply

Take a close look: the regulator is the disk on the gas pipe, just to the left of the meter.

During the winter it is important to keep snow and ice from building up and covering your gas meter and pressure regulator. Melting snow from a roof, drifting snow, freezing rain or water leaking from a gutter can cause an icy build-up. This build-up could interrupt your gas service or cause the appliance to malfunction, which may create a hazardous condition.

Recommendations:

- Use a broom to gently clear snow or ice around your meter.
- Be careful not to hit the meter with your shovel or plow. Don't kick or hit the meter, regulator or piping to knock off snow or ice.

If your gas stops flowing, and there is ice covering your regulator (the big round disk on the pipe leading into the meter), give us a call at 715-425-6177.
